\*\*\* The Yoshimura Universal Turn Signal Bracket Kit is to be used with aftermarket stud-mounted turn signals and is sold separately.

## Removal

1. Remove passenger seat.
2. Remove the upper rear seat cover.
3. Locate and disconnect the license plate light and turn signal connectors.
4. While securely supporting the stock fender assembly, remove the four bolts securing the fender assembly to the frame. Carefully remove the stock fender assembly making sure not to damage the connectors in the process.
5. Disassemble the stock fender assembly and remove the left and right turn signals.
6. Cut the stock license plate light connector from the stock fender assembly. Be sure to cut at least a 6" section of wire from the connector.

## Installation

1. Install (No. 5) *070BG-LH-K1*, Yoshimura license plate light onto (No. 1) *12200-FEBKT*, Yoshimura fender eliminator bracket using (No. 11) *M4X6BHS*, 4mm button head screws provided in the kit.

2. Using the *BN-SSS-22-18* butt connectors provided in the kit, connect the Yoshimura license plate light wires to the stock license plate light wires as follows:

Red -to- Red  
Black/Yellow -to- Black

- a) Strip the stock fender light wire ends 1/4" - 1/2" and insert into *BN-SSS-22-18*, butt connectors provided in the kit.
- b) Center the spliced wire ends in the middle and using a heatgun or lighter, apply heat evenly on the outer edges of the butt connector to shrink and hold wires in place.

- c) Making sure that the stripped ends are centered, heat the center of the butt connector evenly until the solder begins to liquify.
- d) Allow to cool completely and tug both ends of the wires to verify that connection is secured.

Scan for link to butt connector instruction video.

3. Install (No. 1) *12200-FEBKT*, license plate bracket onto (No. 4) *14900-FEBKT*, fender eliminator bracket using (No. 12) *M6X10BHS*, 6mm button head screws.

4. Using the stock hardware, install left and right turn signals onto (No. 2,3) *14200-TSL/R*, left and right turn signal brackets.
5. Install (No. 2,3) *14200-TSL/R*, left and right turn signal brackets and (No. 6) *070BG-LPF*, license plate frame using the (No. 13,14) *M6X16BHS* and *M6X14BHS*, 6mm button head screws as shown below.

6. Route license plate light and turn signal wires through the hole in (No. 4) *14900-FEBKT*, fender eliminator bracket and under passenger seat and re-connect.

7. Install (No. 4) 14900-FEBKT, assembled fender eliminator to frame using (No. 15) M6X25BHS, 6mm button head screws, (No. 10) 6X12X7SPCR, aluminum spacer, (No. 9) 6MMWASHERL, 6mm large washer, and (No. 7) 6MMLN, 6mm nylon lock nut.

Note: Aluminum spacers mount between the fender eliminator bracket and frame.

8. Re-install the upper rear seat cover.
9. Use the cable ties provided in the kit to secure license plate light and turn signal wires beneath passenger seat.
10. Re-install passenger seat.
11. Check for proper function of license plate light, turn signals, brake light, and that all brackets and components are secure prior to riding.
