Optional Parts			
***	070BGUNVTBKT	Universal Turn Signal Bracket Kit	

** Not shown on diagram.

*** The Yoshimura Universal Turn Signal Bracket Kit is to be used with aftermarket stud-mounted turn signals and is sold separately.

Removal

1. Remove rider seat.
2. Remove passenger seat bolt and slide passenger seat forward to remove.
3. Locate and disconnect license plate light and turn signal connectors.
4. While supporting the stock fender assembly, remove the four nuts securing the fender assembly to the frame. Carefully remove the stock fender assembly making sure not to damage connectors during removal.
5. Disassemble stock fender assembly and remove left and right turn signals.
6. Cut the stock license plate light connector from the stock fender assembly. Be sure to cut at least a 6" section of wire from the connector.

Installation

1. Install stock left and right turn signals onto (No. 4,5) *16390-TSL/R*, left and right turn signal brackets.
2. Install (No. 2) *070BG-LH-K1*, Yoshimura license plate light onto (No. 1) *16390-FEBKT*, Yoshimura fender eliminator bracket using (No. 6) *M4X6BHS*, 4mm button head screws provided in the kit.

Note: Slide supplied heat shrink tube over license plate light wires at this time. Keep away from potential heat sources.

3. Assemble Yoshimura fender eliminator by installing (No. 4,5) *16390-TSL/R*, left and right turn signal brackets and (No. 3) *070BG-LPF*, license plate frame using the (No. 7,8) *M6X14BHS* and *M6X16BHS*, 6mm button head screws as shown.

4. Route license plate light wire through the hole in bracket and under passenger seat. Using the *BN-SSS-22-18* butt connectors provided in the kit, connect the Yoshimura license plate light wires to the stock license plate light wires as follows:

Black w/ Yellow Stripe -to- Red
Brown -to- Black

Note: The butt connectors must be offset when splicing into license plate light wires to allow enough room to slide shrink tube over both butt connectors.

CORRECT

INCORRECT

- a) Strip the stock fender light wire ends 1/4" - 1/2" and insert into *BN-SSS-22-18*, butt connectors provided in the kit.
- b) Center the spliced wire ends in the middle and using a heatgun or lighter, apply heat evenly on the outer edges of the butt connector to shrink and hold wires in place.
- c) Making sure that the stripped ends are centered, heat the center of the butt connector evenly until the solder begins to liquify.
- d) Allow to cool completely and tug both ends of the wires to verify that connection is secured.

Scan for link to butt connector instruction video.

5. Route turn signal wires under passenger seat and re-connect. Re-connect license plate light connector.
6. Install (No. 1) 16390-FEBKT, assembled fender eliminator to frame using the stock nuts and (No. 9,10) M6X20BHS and M6X25BHS, 6mm screws as shown below. Torque to factory specification.

7. Use the cable ties provided in the kit to secure license plate light and turn signal wires beneath passenger seat.
8. Re-install passenger and rider seat.
9. Check for proper function of license plate light and turn signals and that all brackets and components are secure prior to riding.
