	KK000106	Diode Kit	

** Not shown on diagram.

IMPORTANT: Installation of this product requires the use of aftermarket M8 mounted turn signals.
Not compatible with stock turn signals.

Removal

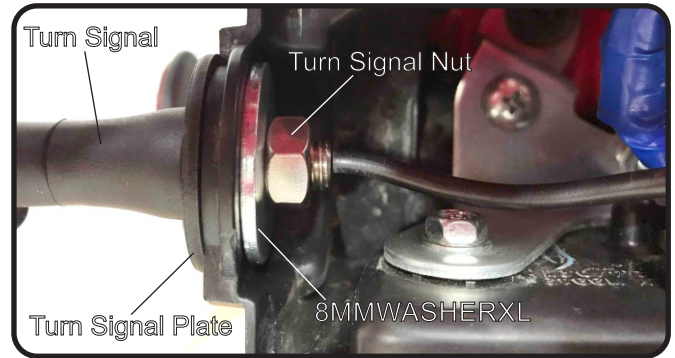

1. Remove the upper taillight cover screw and carefully remove the taillight cover by gently lifting and unclipping the corners.
2. Locate and disconnect left and right turn signal connectors.
3. Remove the plastic push rivet securing turn signal and carefully remove turn signal from the lower taillight cover.

4. Repeat step 3 for opposite side.

Installation

1. Install aftermarket turn signal, turn signal adapter plate, 8MMWASHERXL, and turn signal nut to the lower taillight cover as shown.

2. Repeat step 1 for opposite side.
3. Re-connect turn signal connectors.

Note¹: 073BG-HON turn signal adapter wires are available for purchase separately for direct plug-and-play alternative with Yoshimura LED turn signals.

Note²: A diode and relay will be required for proper function of turn signals and is sold separately.

4. Re-install upper taillight cover using opposite steps of removal.
5. Check for proper function of turn signals and that all components are secure prior to riding.
