Button head screws, washers, and lock nuts are for the bottom two license plate holes.

IMPORTANT NOTE:

This kit does not include turn signal brackets to install OEM or aftermarket turn signals.

Ensure you have all necessary components prior to beginning installation.

Removal

1. Remove passenger seat.
2. Locate and disconnect license plate light and turn signal connectors.
3. While securely supporting the stock fender assembly, remove the four bolts securing the fender assembly to the frame. Carefully remove the stock fender assembly making sure not to damage the connectors in the process.
4. Disassemble the stock fender assembly and remove the left and right turn signals.

Installation

1. Install *FE-LP-BKT*, license plate bracket onto *11720-FEBKT1*, fender bracket using *M6X12FS*, flat head allen screws.

2. Install *HB025024-E*, tail light to *11720-FEBKT1*, fender bracket using the tail light nuts.

3. Install *H-2158T*, wire cover into *11720-FEBKT1*, fender bracket.

4. Install assembled fender eliminator by routing license plate light and turn signal wires through *H-2158T*, wire cover on fender eliminator bracket and through under-tail. Secure fender bracket to frame using *M6X14BHS*, button head screws. Torque to factory specification.

Note: *M6X10BHS*, button head screws, will be used to secure the license plate to *FE-LP-BKT*, license plate bracket. *6MMLN-SS*, nylon lock nuts and *6MMWASHER-SS*, washers are for the bottom license plate holes.

5. Route wires in stock location and re-connect license plate light and turn signal connectors.
6. Re-install passenger seat.
7. Check for proper function of license plate light, turn signals, brake light, and that all brackets and components are secure prior to riding.
